## Next Day Delivery of 25 mil. pitch metal Bi-Lobe™ connectors

Omnetics announces "Off-The-Shelf Nano-Miniature Connectors" built to meet MIL-DTL-32139 specifications. The new Bi-Lobe™ Nanos are available for next day shipment to customers ordering from a long list of standard sizes and designs. Connector formats range from Wire to Wire interconnects to SMT and Flex mounting configurations. Sizes include 9,15, 21, 25, 31, 37,51,& 65 pin counts at 25 mil pitch. The new nano line mimics the

older, larger Micro-D connectors but at significantly reduced size and weights. Miniaturized circuits and portable electronic applications have exploded the demand as well as the completion of a new Military Standardized design and list of test specifications. Custom or modified designs, plus other pre-designed standards are also available as "built-to-order" processing.

The metal Bi-Lobes™ have been proven in uses from Military Aircraft, Patriot Unmanned Vehicles, Space Robotics and Gyro systems, to mention a few. They are also used in medical instrumentation as well as part of portable electronics systems for a very wide range of applications from Ground Soldiers to Doctors.

**Specifications and designs are available on the Web @ [www.omnetics.com](http://www.omnetics.com) or available by calling Omnetics @ ph. 800-343-0025 or 763-572-0656.**
